Using the concepts of Expected Points Added (EPA) and Win Probability Added (WPA), 2012 nfl nike jerseys, we can compare the effectiveness of the two defensive schemes over the past 10 seasons. EPA measures each play among terms of the different surrounded the potential obtain of net point advantage. They have given their teams an added four percent greater accident of winning every game, hockey jerseys cheap, yielding 11 less yards per game than their 4-3 counterparts The 3-4's advantage is sizable against either the run and the pass. It's still not explicit exactly how 3-4 defenses are learned to accomplish better success. 3-4 defenses featured a higher sack rate than 4-3 defenses, nba swingman jerseys, soccer jersey replica, 6. six percent compared to 6. three percent But the 4-3 had a higher interception rate, three. 0 to two. nine I'll leave the question to the Xs and Os guys to quarrel.
